

MIKE

Just received your letter. Let me understand this clearly. The President is the only one who can give permission for fracking to occur. But then he completely removes himself from any responsibility or oversight or regulation what so ever with the insane belief that the states DEP will have the expertise or integrity to regulate and prosecute.

Well we already know the DEP is criminally corrupt. I hope by now you guys at EPA are investigating them. But given your lack of doing anything for past 6 months that's not even certain.

If you are telling me I am responsible for the complete testing of my well because DEP did only the minimal incomplete testing that was not sufficient for numerous toxic elements including Uranium and Radon that I now believe was in my water all along then what good is a criminally corrupt completely incompetent completely incomplete DEP testing.

As I stated in my letter I sent you yesterday at this point in time I CAN'T even find a private testing company that is trustworthy that has not been corrupted by fracking money.

National Testing Co. in Ohio steered me to Bryan Oram the criminal who found a whole new way to get rich lying and giving false testimony at Settlement ~~and~~ Courts of Law since you guys at EPA quit doing your job.

My test results I tried to E-mail you from Mountain Research went missing from their computer records over the entire Holidays and then magically reappeared after New Years. I still can't be sure what you got. They called me twice between Thanksgiving and Christmas frantically asking me for help to find them.

I can't find a honest testing company and even if I could in my case I have fracking debris in my well a fact completely ignored by Dave Engle who saw the debris on my well pump a concrete proof piece of evidence he never saw before as my experienced well man Keith Hull has never either in his entire life. Yet every body totally ignores this fact as though it was nothing.

ISN'T that fact alone enough for the EPA to take over the investigation. IT'S concrete PROOF
I'm suppose to somehow get the testing Representative and my well man's schedule to coincide and have both of them at my place at same time. otherwise I CAN'T get sample of physical evidence from inside my well.

the burden your placing on me is unreasonable and unrealistic.

You must intervene here given the DEP's already IGNORING OF CONCRETE PHYSICAL EVIDENCE they personally already SAW. And then only did minimal testing on. But still tested Barium at 4733mg/L completely IGNORED

I realize these mountains are completely different from lay of land else where in state. I realize that you and everybody else never heard of a American citizens well & house plumbing getting blown up with extreme pressure but that's what happened! That's how their debris got into my well. Dave Engle never even heard this from me until 2 weeks ago when I sent him a letter after he finally called me. He never made any effort to contact me for 6 months to find out anything and after receiving information in my letter he did nothing but try to contact you and remove EPA from Picture and involvement. And remove EPA from Picture and involvement had nothing to do with my well water. Well water I enjoyed for 14 years with no pollutants but discoloring Manganese that I had a backwash water filtration system installed in 1996 to remove.

I have given you all the evidence you need to intervene in my case. PROVING CONCLUSIVELY DEP is completely IGNORING Fracking Pollution and concrete physical evidence they personally SAW. What more do you need to hear. I have said the exact same thing to you from first time & talked to you until this very day.

I hope you will finally intervene and help me it is literally a matter of life & death. It is literally a matter of life & death seriously. I believe a thorough test of my well that already is seriously polluted will reveal practically every toxic element on the periodic table & radioactive Uranium & radon. You have power & evidence to intervene.
